Leaders in Fibre Optic and LED Step Lighting ...

## STEP AND AISLE LIGHTING

LED technology combined with Poly Optics' Super Side Light solid core fibre optic cable has opened up a range of design possibilities previously thought unachievable.

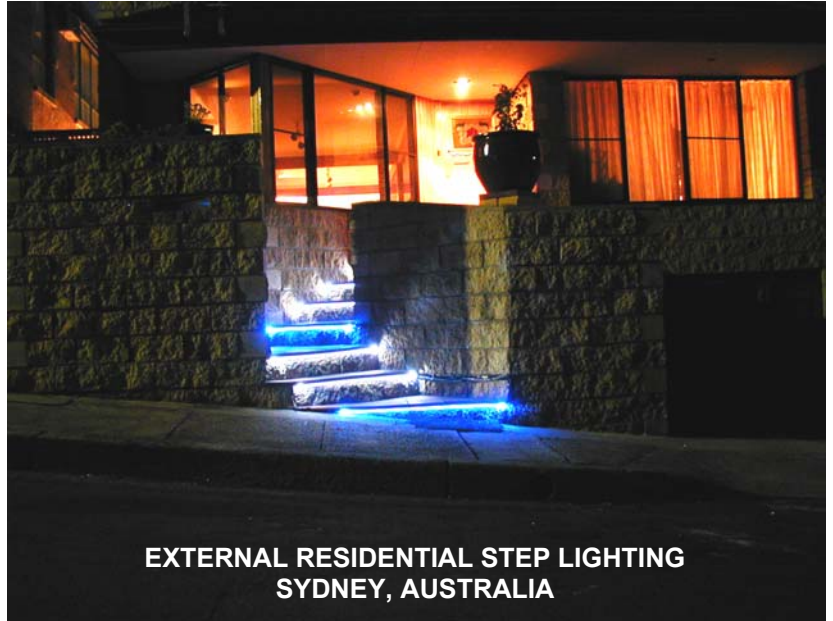

What better way to light up staircases and aisles than with Poly Optics' Super Side Light fibre optic cable lit with LEDs?

Turn ordinary stairs into amazing lighting features.

Poly Optics has developed a fibre optic lighting system which can achieve this like no other system on the market.

Ideal for a range of applications including:

- Home stairway Lighting
- Cinemas
- Emergency Stairway Lighting
- Entertainment Areas
- Pedestrian Areas
- Vehicle Aisle Lighting

EXTERNAL RESIDENTIAL STEP LIGHTING  
SYDNEY, AUSTRALIA

Light strips are available in various lengths and diameters of Super Side Light fibre optic cable.

LEDs are placed at each end of fibre optic strips up to five metres (16 feet) in length to provide either single colour or colour changing effects.

Because the system uses LEDs, up to eight steps can be illuminated with just one watt of power!

In addition, the product is heat free and requires low maintenance with a lamp life in excess of 50,000 hours!
