

Poly Optics Australia

Leaders in fiber optic lighting ...

Super Side Light Fiber Optic Cable

Forget what you previously thought fiber optic lighting could achieve because now fiber optics are brighter than ever before! Poly Optics has created a solid core fiber that emits up to three times more light than any existing solid core side light fiber on the market. The possibilities for using a flexible, heat-free and energy efficient fiber optic cable this dazzling are endless! Super Side Light is specifically designed to be lit with LEDs which means conventional light drivers are not required.

Available in a range of diameters:

- 5.5mm
- 7.0mm
- 9.0mm
- 10.0mm
- 12.0mm
- 14.0mm

For applications of up to 5 metres in length.

Also available in clear protective jacket.

Ideal for a range of applications:

- Strip lighting
- Stair lighting
- Home theatres
- Nightclubs
- Entertainment areas
- Restaurants
- Inside vehicles
